Dear Sir/Madam

Re: Social Services Legislation Amendment (No Jab, No Pay) Bill 2015

From an extensive review of the literature on vaccines from Jenner (all 43 pages of the nonsense he wrote about 'horsegrease' and cow puss) to the present, I believe that vaccines are worthless and toxic

However this is hardly the point of my submission. I do not believe that people should be forcibly denied vaccines because of my view, and equally therefore it is wrong in a modern democracy to punish parents for not undertaking **optional** medical interventions

The brilliant British scientist, Alfred Russel Wallace submitted his essay "Vaccination a Delusion" to the British Parliament in 1898 in response to what he termed the "ignorance and incompetence displayed by the Royal Commission" of 1889 in relation to Smallpox. His words below from 1898 are unfortunately perfectly true today, 117 years later, with regards to this vile legislation being proposed in Australia

VACCINATION A DELUSION

Its Penal Enforcement a Crime:

PROVED BY THE OFFICIAL EVIDENCE IN THE REPORTS OF THE ROYAL COMMISSION

BY ALFRED RUSSEL WALLACE LL.D. DUBL., D.C.L. OXON., F.R.S., ETC

SWAN SONNENSCHEIN & CO., LIMD. PATERNOSTER SQUARE 1898

"This Essay has been written for the purpose of influencing Parliament, and securing the speedy abolition of the unjust, cruel, and pernicious Vaccination laws … I most solemnly urge upon our Legislators that this is a question not only of the *liberties* of Englishmen, but one affecting the *lives* of their children, and the *health* of the whole community; and that they will be individually responsible if they do not inquire into this matter for *themselves*,--not accept the statements or opinions of others"

"In order that they may do this with a minimum expenditure of time and labour, I have put before them the *essential facts*, in almost every case taken from the Reports of the Royal Commission or of the Registrar-General, and with references to page, question, or paragraph, so that they can themselves verify every statement I make. I thus abundantly prove, first, that in all previous legislation they have been misled by facts and figures that are untrue and by promises that have been all unfulfilled; and that similar misstatements have characterised the whole official advocacy of Vaccination from the time of Jenner down to this day. I claim, therefore, that all official statements as to Vaccination are *untrustworthy*"

"I then show that *all* the statistics of small-pox mortality, whether of London; of England, Scotland, and Ireland; of the best vaccinated Continental States; of unvaccinated Leicester; or of the revaccinated Army and Navy, without any exception, prove the *absolute inutility of Vaccination*; and I feel confident that every unprejudiced person who will carefully read these few pages, and will verify such of my statements as seem to them most incredible, will be *compelled* to come to the same conclusion.

"I appeal from the medical and official apologists of Vaccination to the intelligence and common sense of my fellow-countrymen, and I urge them to insist upon the immediate abolition of all legislation enforcing or supporting this useless and dangerous operation"

Yours Sincerely

Brenden Edis
